EXCEEDING YOUR EXPECTATIONS

Xpondr™ Tag and Accessory Range •

Choose from a range of  
Tags and Accessories  
to support your Xpondr™  
Security Tagging System

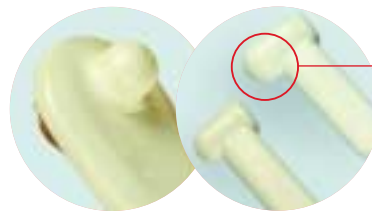

#### AG Pencil Tag

- At 8 grams and the size of a ballpoint pen cap, the AG Pencil tag is one of the smallest reusable security tags available. A unique soft foam insert on the tag minimises the risk of textiles being dimpled by the tag.

#### AGB Teardrop Tag

- This tag is fitted with a raised ring around the point of pin entry. This gives maximum protection against attempts to cut the pin shaft and is particularly effective when used with a Dome Head pin.

#### Armor Tag Version

- With a slightly bigger dome at the back on each tag, the premium priced Armor version offers protection against illicitly obtained Tag Releasers and greater resistance to violent attempts at tag removal.

### Tag Releasers

- All releasers are supplied with locks and are available in three options.

### AG Surface Mount

- Fitted directly on top of a counter using security screws that can only be removed by MAXTAG technicians.

### AG Flush Mount

- Countersunk into the work surface for an obstruction free wrapping area.

### AG Universal

- Required for Armor version tags. Can be fitted flush or surface mounted.

### Flex Ink Tag

- Available in yellow or white with red indelible die capsules. Used in situations where a non-electronic tag solution is required. Force applied to this product will release die on to the garment rendering it unwearable and unsaleable.

### Lanyards

- Black, plastic coated, woven steel wire used to secure tags to items such as handbags, luggage, shoes, tennis rackets and so on. Available in 100mm, 200mm and 300mm lengths.

### Pins

- All Xpondr™ pins are made from specially selected steel that is not so brittle it may snap and not so soft it may be cut by repeated bending. Both the Dome Head and Flat Head version may be used with each tag option. The Flat Head tag is lighter and more discreet. The Dome Head pin offers greater protection against illicit pin removal particularly when used with the AGB Teardrop tag.

### Electronic Double Checker

- Fitted on or under the counter, this device will give a soft beeping noise if tagged merchandise is placed above it. Used by retailers who understand that staff occasionally forget to remove security tags. This prevents possible embarrassment to customers when leaving the shop.
