

# Stargate XL

long-range antennas for wide aisles

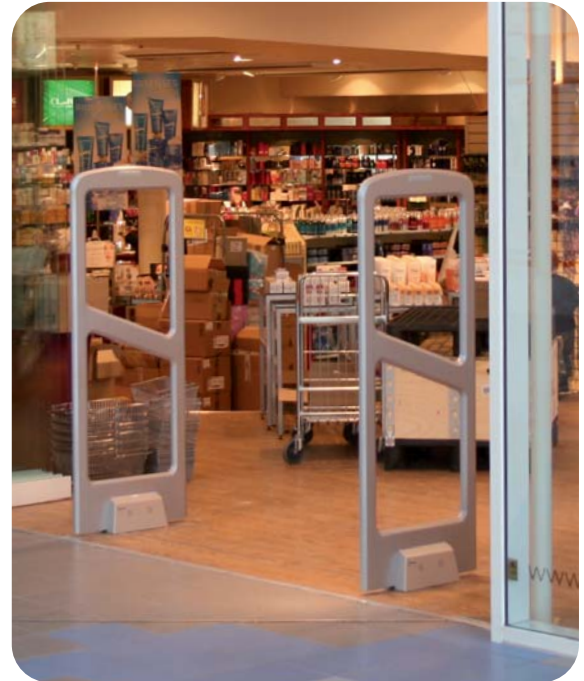

Stargate XL comes with all the benefits of an acousto-magnetic (AM) alarm system and is particularly suited to wide aisles. One XL antenna can cover the area that two other types of antenna are typically required. This is advantageous in shops where larger trolleys are used.

Stargate XL is built to withstand the general buffeting from trolleys in high volume stores.

### about AM technology

In particular, acousto-magnetic (AM) technology is suited to guarding wide aisles and entrances. AM alarm systems can also be mono-configured, which means an entrance or aisle can be protected by a single antenna.

AM antennas work in conjunction with hard tags and very small, discreet adhesive labels, advantageous to outlets selling smaller items. AM labels are quick and easy to deactivate.

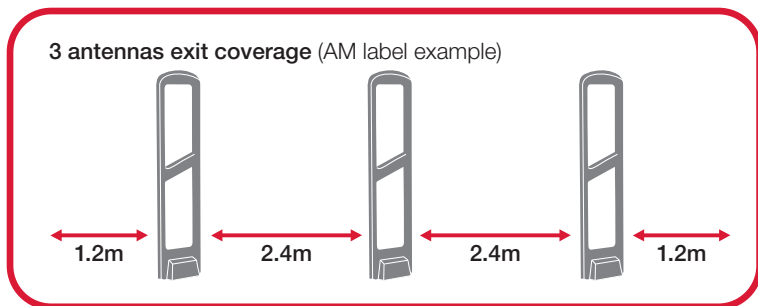

### Galaxy Midi & Midi Ink

AM Label

A3

### features

- Suitable for wide aisles
- Can operate as mono-antenna
- One control box operates up to three antennas
- Stargate AM systems detect on each side of the antenna

### specifications

width	600 mm
height	1576 mm
thickness	32 mm
thickness at base	150 mm
standard colour	silver grey
standard frequency	58 KHz

### total exit coverage

Antennas	AM label	A3	Galaxy Midi
1	2.4 m	2.6 m	2.6 m
2	4.8 m	5.2 m	5.2 m
3	7.2 m	7.8 m	7.8 m

AM hard tags are fire-resistant and fitted with super-strong magnets to prevent tampering. All hard tags come with smooth pins that will avoid damage when applied to garments.
