

# MAXTAG

EXCEEDING YOUR EXPECTATIONS

## Xpondr™ DAPA Panel ●

A security tagging system with a clear acrylic panel that gives a more overt deterrence to possible thieves.

This system is capable of protecting entrances up to 7 metres wide using only 3 panels.

A unique frequency division technology ensures that only tagged merchandise will activate the alarm.

For optimum detection performance a secondary 'chirp' feature alerts staff when tagged merchandise is displayed too close to the system.

### Standard frequency

Frequency Division	transmits at 132KHz
	receives at 66KHz

### Dimensions

Height	1250mm
Width	390mm
Thickness	30mm
Base dimensions	520 x 140mm
4Rx mini receivers	215(h) x 65(w) x 75(d)mm
4AN digital alarm counters	75(h) x 120(w) x 50(d)mm

### Total detection coverage

One panel	1m either side
Two panels	2m
Two panels (with 4Rx mini receivers on door uprights)	4m
Three panels (with 4Rx mini receivers on door uprights)	7m
