

MAXTAG

EXCEEDING YOUR EXPECTATIONS

Xpondr™ Digital Loop ●

The discrete security tagging system that is capable of protecting entrances up to 5 metres wide without the need for visible pedestals.

A unique frequency division technology ensures that only tagged merchandise will activate the alarm.

For optimum detection performance a secondary 'chirp' feature alerts staff when tagged merchandise is displayed too close to the system.

Standard frequency

Frequency Division

transmits at 132KHz

receives at 66KHz

Dimensions

4Rx mini receivers

215(h) x 65(w) x 75(d)mm

4AN digital alarm counters 75(h) x 120(w) x 50(d)mm

Total detection coverage

Entrances from 1 metre up to 5 metres

MaxTag sales specialists will provide constructive technical guidance to ensure that an efficient balance is achieved between the proximity of tagged merchandise, the size of an entrance and optimum detection performance.
