

MAXTAG

EXCEEDING YOUR EXPECTATIONS

Xpondr™ 8 Series Panel ●

A stand-alone economy priced tagging system that will detect tagged merchandise up to a 1 metre radius of each panel. Two panels will protect a 2 metre entrance and so on.

A unique frequency division technology ensures that only tagged merchandise will activate the alarm.

For optimum detection performance a secondary 'chirp' feature alerts staff when tagged merchandise is displayed too close to the system.

Standard frequency

Frequency Division

transmits at 132KHz

receives at 66KHz

Dimensions

Height	1275mm
Width	305mm
